Professional Summary

Software Engineer focused, proactive and growth-focused Junior Software Engineer with solid hands-on experience developing web applications using React, TypeScript, Next.js, Nest.js, Node.js, Tailwind CSS, SQL, Python, Claude, Linux, Rest, Ai, Agents, 1 years experience.

AI

RAG (Retrieval-Augmented Generation), Vector Databases (Qdrant, pgvector, Weaviate, FAISS), LLM Integration (Claude, GPT, Gemini), Embeddings, Document Chunking, Semantic Search, Prompt Engineering, Ai Agents, 1 years experience.

Skills

- React | Angular | Next.js | Nest.js | TypeScript | JavaScript | Node.js | Express | Fastify | Tailwind CSS | Frontend | Agile Methodologies | UI/UX | Figma | Web Performance | CI/CD | Kubernetes | Python | SQL | Git | API Rest | Ai | Agents | Claude | Linux | LLM | OpenAi

Experience

Software Engineer

[Resume Generator ATS](#)

June 2026 - Present

- Developed a full-stack ATS-optimized resume generation platform, integrating a reactive Next.js front-end with real-time PDF rendering and a robust NestJS API using Fastify, PostgreSQL, and Prisma for data persistence.
- Optimized global web performance, achieving a perfect 100 score in Performance on Desktop (98 on Mobile), alongside 100 in SEO and Best Practices on Google PageSpeed Insights, featuring a blazingly fast 0.5s LCP, by orchestrating deployments on Vercel and Render.
- Enhanced the user interface and experience by integrating a persistent Dark Mode and dynamic internationalization (en-US and pt-BR), ensuring zero-latency form synchronization with Zustand and strict schema validation with Zod (end-to-end type safety).

Tech Stacks: React.js, Next.js, NestJS, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Zustand, Zod, Shadcn UI, Next-Themes, Vercel, Render, Ai, Agents

Software Engineer

[Professional Portfolio](#)

February 2026 - March 2026

- Optimized overall web performance and SEO ranking, achieving a Grade 'A' (99%) on GTmetrix with a 610ms LCP, alongside >90 scores in Accessibility and SEO on Google PageSpeed Insights, by implementing Server-Side Rendering (SSR) with Next.js.
- Optimized the recruiter navigation experience by ensuring zero latency when exploring portfolio items, implementing a dynamic categorization system using React's state management.
- Implemented a highly accessible user interface with prolonged visual comfort (persistent Dark Mode), building modular components with Tailwind CSS, Shadcn UI, and the Next-Theme library and using LLM with Ai agents.

Tech Stacks: React.js, Next.js, TypeScript, Tailwind CSS, Git, Ai, Agents

Software Engineer

[Gallery Plus](#)

November 2025 - December 2025

- Developed the gallery's caching and dynamic filtering architecture, optimizing image loading and enabling state persistence via URL search parameters by integrating TanStack React Query with the Nuqs library.
- Optimized backend API consumption (hosted on Railway), significantly reducing excessive network requests and improving search performance by implementing a custom debounce algorithm using React Hooks.
- Guaranteed data integrity and request safety during photo uploads and album creation by implementing robust schema validations using Zod and inferring strict static typing with TypeScript.

Tech Stacks: React, TypeScript, Tailwind CSS, TanStack Query (React Query), Nuqs, Zod, React Router, Vite, Ai, Agents

Software Engineer

[React To-Do List](#)

August 2025 - September 2025

- Developed state management and data persistence for the CRUD application by building React Custom Hooks, utilizing the browser Local Storage API as a local database to retain user tasks across sessions.
- Optimized user experience (UX) by implementing Skeleton Loaders for visual feedback during data fetching and building a responsive Light/Dark theme toggle using Tailwind CSS.
- Implemented a scalable front-end architecture using React Router for navigation and class-variance-authority (CVA) to build a standardized UI component library, deployed continuously on Vercel.

Tech Stacks: React, TypeScript, Tailwind CSS, React Router, (CVA) class-variance-authority, Vite

Education

- Bachelor in Systems Analysis and Development - University, Senac | February 2026 - June 2028

Certifications

- Python Essentials 1 - Course, Senac-SP e Cisco Networking Academy | March 2026
- Fundamentals of Computer Hardware - Course, Senac-SP e Cisco Networking Academy | May 2026

Languages

- Inglês - Professional Working Proficiency | Espanhol - Basic | Português - Native
